DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Fukuda 6,116,939. Fukuda discloses a connector 100, comprising an inner housing 11 which holds a plurality of electric wires (W); an outer housing 20, which accommodates the inner housing along a first direction, a fixing member 15, which fixes the inner housing and the outer housing to each other; and a convex portion 15a, which protrudes from an outer surface of the inner housing in the first direction, wherein when the fixing member 15 fixes the inner housing and the outer housing to each other, the convex portion 15a abuts against the inner surface of the outer housing so that a repulsive force is generated between the inner housing and the outer housing.

Regarding claim 2, Fukuda discloses an engaging member which includes: an engaging projection 19, which protrudes from the inner housing in a direction intersecting with the first direction, and which extends along the first direction, and an engaging guide groove 27, which is provided in the outer housing, and which engages with and guides the engaging projection along the first direction.

Regarding claim 3, Fukuda discloses the engaging member 19 being a plurality of the engaging members, and wherein each of the engaging projections of the plurality of the engaging members protrudes in a direction intersecting with the first direction.

Regarding claim 4, Fukuda discloses the convex portion 15a being a plurality of the convex portions; wherein each of the convex portions is disposed in a vicinity of the fixing member.

Conclusion

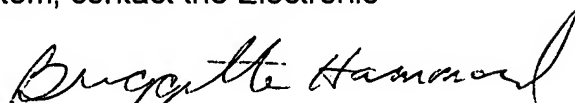

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Briski et al 5,681,185 was cited for a similar connector.
